3.1

Article

- 4.1 Introduction
- 4.1.1 Notation
- 4.2 Methodology
- 4.3 Theoretical properties
- 4.4 Simulations & numerical study

Appendix A

Some Appendix

Contents				
	A.1 with subsection			
	A.2 and another one			
A.1	with subsection			

A.2 and another one

Appendix B

Code Examples

B.1 with comments

```
# --- install --- #
install.packages(c("fda", "fda.usc"))
# --- general packages --- #

library(data.table)
# --- FDA packages --- #

library(fda)
library(fda.usc)
```

B.2 Math in code bloc

B.3 some generic code

another code block:

```
fda_optimal_basis <- ...
fdata_obj_temp <- fda_optimal_basis[["fdata.est"]]

fdata_obj <- fda.usc::fdata2fd(fdata_obj_temp)

fpca_result <- fda::pca.fd(

fdobj = fdata_obj,

nharm = 3,

# centrer les données

centerfns = TRUE

)</pre>
```

B.4 inline block with math

Regardons désormais à quoi ressemble la sortie :
